

100 Ways to Cut 100 Calories

Maintaining a healthy weight depends on achieving energy balance. This is accomplished by balancing the amount of energy burned and food consumed in your day. To stop weight gain, most Americans need to do just two simple things:

- **Add 2000 more steps each day**
- **Eat 100 fewer calories daily**

Small changes in the types of foods you eat and in the portion sizes you choose will quickly add up to 100 reduced calories, or even more! By pledging to walk an extra mile (equivalent to 2000 steps) and reduce 100 calories (equivalent to 1 tablespoon of butter) you'll see how easy it can be to achieve energy balance.

Find ways to cut calories during your day with this list of ideas.
