

Quit Now

More and more public places in North Carolina are becoming tobacco-free. This includes many private and state worksite buildings and even state vehicles. Local governments are also kicking the habit. All public schools and many hospitals have banned tobacco products and many restaurants and bars are now telling customers to take it outside.

Why Quit Now?

- ◆ Cigarette smoking is the number one preventable cause of death in the United States
- ◆ Smoking can cause stroke, premature death, heart disease, several types of cancer, chronic bronchitis and emphysema
- ◆ Secondhand smoke can cause lung cancer and heart attacks in people at risk for heart disease
